

10 POSITIONS · 2 ROLES

Internship Opportunities

Selected students from the InnovateX – IncuxAI Hackathon 2026 may be considered for the following internship opportunities.

MODE

Online

DURATION

3–6 Months

TYPE

Unpaid Internship

ROLE 01

Full Stack Developer Intern

3 Positions

Suitable for: B.Tech/B.E. students from CSE, IT, AI & DS, AI & ML and related branches.

ROLE INCLUDES

- Frontend and backend development
- Web application development
- API development and integration
- Database management
- Building responsive user interfaces
- Testing and debugging
- Integrating AI features into applications
- Working on real-world product development

PREFERRED SKILLS

HTML

CSS

JavaScript

React.js

Node.js / Python / Java

REST APIs

MySQL / PostgreSQL / MongoDB

Git & GitHub

GOOD TO HAVE

Cloud deployment

Docker

AI API integration

ROLE 02

AI/ML Developer Intern

7 Positions

Suitable for: B.Tech/B.E. students from CSE, AI & ML, AI & DS, Data Science, IT and related branches.

ROLE INCLUDES

- Developing AI/ML applications and prototypes
- Working with real-world datasets
- Data preprocessing and analysis
- Developing and evaluating ML models
- Working with AI APIs
- Developing Generative AI / LLM applications
- Building AI proof-of-concepts
- Integrating AI features into applications
- Documenting experiments and results

PREFERRED SKILLS

Python Machine Learning Deep Learning

Data Science Statistics NumPy

Pandas Scikit-learn

Basic neural networks

GOOD TO HAVE

TensorFlow / PyTorch Generative AI LLMs

Prompt Engineering RAG Vector Databases

LangChain / LlamaIndex AI APIs Azure AI

Computer Vision NLP

Selection

Students will be evaluated on:

- 01** Technical skills
- 02** Project work
- 03** Problem-solving ability
- 04** Creativity
- 05** Performance during the InnovateX hackathon / selection process
